1. INTRODUCTION

Humanity economy is economy term inrefer to human rights. Humanity itself is defined as a human rights definition as is shown in wiki as the basic right and freedoms to which all humans are entitled. Economy is a system of making and trading things of value. So *humanity economy is define* as making things of value in basic right and freedom to which all humans are entitled in human time expense to making things in value. In real life humanity economy is income in human time expense to get income. In math those theory can be written

$$HE = Inc\ /time\ exp... (1)$$

Where HE is humanity economy,Inc is income and time exp is human time expense to get income.

2. PROBLEM

What does the theory for? Is it useful enough to understand ratio in income to humanity of time expense as human right in expense time. We choose traditional culinary as sample to applied the theory of humanity economy. Why do we choose a traditional culinary? Traditional culinary is usually run by single economic agent as owner, worker, and seller. Traditional culinary is prepared deserve, sell and include dishes after process. The wish of this research goal is matching humanity economy theory with ordinary life.

3. METHOD

Data collection is in literacy,interview,photographic document and video document. The question is simple as follow the objective of this research,

1. How much income in a day?

2. How much time expense to prepare process until the end of process?

The sample should be the owner of traditional culinaryitself. Use (1) equation to calculate data collected. Use simple statistically to get average of human economy in traditional culinary final analysis.

4. RESULT AND ANALYSIS
Average humanity income

LPB Sosial (Surabaya/ East Java) 2019

| Spot | No | Income (Rupiahs) | Time Expense | | | HE |
			Prepare	Deserve	Total (Hr)	Rupiahs per hour
Blauran	1	200.000	05:00-08:00	10:00-22:00	15	13.000
	2	250.000	05:00-06:00	10:00-21:00	12	21.000
	3	200.000	05:00-08:30	10:00-21:30	14	14.000
Manukan	1	100.000	06:00-07:00	10:00-19:00	11	9.000
	2	200.000	13:00-15:00	16:30-00:30	11	18.000
	3	800.000	06:00-08:00	09:00-20:30	13,5	59.000
Kepanjen	1	150.000	09:00-12:00	12:30-18:00	8,5	18.000
	2	750.000	08:00-12:00	16:00-23:00	12	63.000
	3	500.000	08:00-13:00	14:00-23:00	14	36.000

Table 1. H.E. for people who running culinary on various location in Surabaya.

Average culinary people is 28.000 Rupiahs

Comparator result of these research is H.E. other single profesion and it is pick up income data from online single motor bike transport. Reason of pick up this data because the human economic characteristic is similar exept biker is free lence of company partner.

For two days biker H.E. for a days on,
1.)27 February
Income 142.000 Rupiahs
Time from 10:00-18:00 = 8 hours
H.E. :18.000 Rupiahs
2.)28 February
Income 163.000 Rupiahs
Time from 07:00-18:00 =11 hours
H.E. :15.000 Rupiahs
Average online bikers is 16.500 rupiahs

For make batik,
1.)Income 25 million
Time 3 months/480 hours
H.E. 52.000 rupiahs

5. CONCLUSION

Traditional culinary market can be analyzed with humanity economy concept.Humanity economy this (1) equation can answer the humanity economy culinary market in Surabaya in average and the number is... 28.000 Rupiahs.

Culinary people more worth than online biker.
